Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 January 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is **non-final**.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Response to Amendment

The rejection of claims 1-4 under 35 USC § 112 is withdrawn by the examiner in view of the amendment filed on January 27, 2003.

~~Claim Rejections - 35 USC § 102~~

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Julian et al. (5,863,315).

Julian discloses a process for separating of a hydrocarbon mixture (e.g., isopentane) by using an adsorption system which comprises at least three adsorption zones that function similar to the claimed process. The adsorption zone is operated at a temperature of from 100 to 400⁰ C and at a pressure of from 5 to 40 bars and the desorbent is an aliphatic hydrocarbon. (See col. 3, line 15 through col. 7, line 45; figures 1-9 and 13-21)

Response to Arguments

The argument that Jullian does not disclose that a plurality of columns are designated to function from a secondary adsorption device, to a primary desorption device, and to a desorption device in sequence, but discloses a process in which only one column carries out the adsorption

Art Unit: 1764

which can end when or before the column is saturated and lasts three subsequent phases.

However, the argument is not persuasive because Jullian discloses an adsorption process wherein a hydrocarbon mixture feed is passed into a first adsorption zone to produce an effluent which is passed into a second adsorption zone to produce a second effluent which is passed into a desorption zone as claimed. Jullian also discloses steps of discharging effluents from the first, second, and desorption zone as claimed.

The argument that Jullian process include first pressuring, depressurizing, and second pressurizing phases, while the process of claim 1 does not use the pressure changes for adsorption and desorption is noted. However, the argument is not persuasive because the claimed process does not exclude the pressure changes in the adsorption and desorption steps.

The argument that the claimed process is operated at lower temperatures and pressures is noted. However, the argument is not persuasive because the claimed temperatures and pressures overlap with the operating temperatures and pressure of Jullian.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period

Art Unit: 1764

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
